WHAT IS AN APPRAISAL REPORT?

Art valuation, an art-specific subset of financia valuation, is the process of estimating the market value of works of art. As such, it is more of a financial rather than an aesthetic concern, however, subjective views of a cultural value play a part as well. Art valuation involves comparing data from multiple sources, such as art auction houses, private and corporate collectors, curators, art dealer activities, gallerists (gallery owners), experienced consultants, and specialized market analysts to arrive at a value.

Art valuation is accomplished not only for collection, investment, divestment, and financing purposes, but as part of estate valuations, for charitable contributions, for tax planning, insurance, and loan collateral purposes. This article deals with the valuation of works of fine art, especially contemporary art, at the top end of the international market, but similar principles apply to the valuation of less expensive art and antiques.
